

$$2l = \frac{1}{7}a \sqrt{4^2 + 7^2} = \frac{\sqrt{65}}{7}a$$

$$a = 90 \text{ mm} \Rightarrow 2l = 103,6$$

$$2l = \frac{1}{7}a \sqrt{3^2 + 7^2} = \frac{\sqrt{58}}{7}a$$

$$a = 90 \text{ mm} \Rightarrow 2l = 97,9$$
